DETAILED ACTION

Response to Amendment

Applicants have amended claims 2-3 and added New claims 4-10, which require the following restriction due to different inventions clearly addressing in these claims.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

A. Claims 1-3 (original) drawn to an optical laminated body comprising a first transparent film disposed closely to a front surface of a polarizing layer, second transparent film disposed closely to a back surface of the polarizing layer, wherein both of the first transparent film and the second transparent film are diffusive films; and a surface light source (of light guider) supplying light to the optical laminated body through a light entry surface of the first transparent film

B. Claims 2-3 (amended) drawn to an optical laminated body comprising a first transparent film disposed closely to a front surface of a polarizing layer, second transparent film disposed closely to a back surface of the polarizing layer, and a lens film disposed between the light source and an optical laminated body; wherein both of the first transparent film and the second transparent film are diffusive films.

C. Claims 4-5 (new) drawn to LCD device.

D. Claims 6-10 (new) drawn to an optical laminated body comprising a first transparent film disposed closely to a front surface of a polarizing layer, second transparent film disposed closely to a back surface of the polarizing layer, wherein both of the first transparent film and the second transparent film are diffusive films and the light source comprises a plurality of diffusing points of a light diffusive substance disposed on a surface of the light source.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims and any drawings readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOAN C. NGUYEN whose telephone number is (571) 272-2296. The examiner can normally be reached on MONDAY-THURSDAY:8:00AM-4:30PM.
